

Government Scheme Knowledge Base

Structured reference dataset for an AI-powered government scheme recommendation and assistance platform

Version: v1.0 prototype knowledge base **Prepared:** 02 September 2026

Purpose: Provide a source-traceable starting corpus for scheme matching, eligibility rules, financial calculations, document checklists, RAG explanations, and channel-partner guidance.

Important: This is a curated prototype knowledge base, not an official government publication and not an exhaustive list of all government schemes. Scheme terms can change. Exact eligibility, sanction, documentation and application route must be verified against the current official source before production use.

How to use this document

- Use the scheme records as structured source material for your RAG/vector database.
- Convert the tables into JSON/PostgreSQL records for deterministic eligibility matching.
- Keep the official source URL, source document and last-verified date with every record.
- Do not let an LLM invent or override hard eligibility conditions.
- Treat financial figures as scheme terms, not as guaranteed loan approval.

3. Normalized Eligibility Fields

Use these fields as the canonical schema for your rule engine. A scheme should only contain a rule when the official source explicitly provides it.

Field	Meaning	Example normalized value
category	Beneficiary social/target category	OBC / SC / sanitation worker
annual_income	Annual family income in INR	250000
age	Applicant age in years	27
purpose	Primary purpose	business / education / skill
activity	Specific activity	tailoring / sanitation vehicle
project_cost	Total project cost in INR	400000
loan_required	Requested financing in INR	350000
education_status	Admission/course status	admitted / studying
marks	Qualifying examination percentage	55
location_state	State	Tamil Nadu
location_district	District	Coimbatore
group_size	SHG/group member count	12
group_category_share	Share of target-group members	0.60
partner_type	Required route	SCA / Bank / RRB / NBFC-MFI

Eligibility status model

- **eligible:** all required hard rules are satisfied and required information is present.
- **potentially_eligible:** no hard conflict was found, but one or more non-critical fields require verification.
- **insufficient_information:** a required rule cannot be evaluated because the user has not supplied the necessary information.
- **not_suitable:** one or more hard eligibility rules clearly fail.

4. Recommendation Scoring Model

The score below is a prototype suitability score. It is not an official government score and must never be presented as an approval probability.

Factor	Weight	Example
Category / target-group fit	25	Exact target-group match
Income fit	20	Income safely within stated limit
Purpose / activity fit	20	Activity explicitly supported
Financial fit	20	Requested amount/project cost fits
Location fit	10	Scheme available in location
Partner accessibility	5	Suitable partner route identified

5. RAG Knowledge Model

Store each document chunk with enough metadata to answer 'why?' questions and trace every factual response back to an official source.

Metadata	Purpose
scheme_id	Connects the chunk to a scheme
organization_id	Identifies issuing organization

Metadata	Purpose
document_name	Official document title
page_number	Exact page for citation
source_url	Official source URL
effective_date	When the rule became applicable, if stated
last_verified	Date your team checked the source
content	Extracted text chunk
embedding	Vector for semantic retrieval

Recommended RAG flow

Official PDF → text extraction → page-aware chunking → metadata tagging → embeddings → pgvector → retrieve top relevant chunks → grounded answer → show source/page.

6. Financial Calculation Model

For conventional amortizing loans, use the standard EMI formula. Always label the output as an estimate and use the scheme's actual interest/tenure terms.

$$EMI = P \times r \times (1+r)^n / ((1+r)^n - 1)$$

- P = financed principal.
- r = monthly interest rate (annual rate / 12 / 100).
- n = total number of monthly instalments.
- Handle zero-interest cases separately.
- Do not calculate EMI for grants/subsidies that are not loans.

7. Channel Partner Data Model

Field	Description
partner_id	Unique identifier
name	Institution/agency name
partner_type	SCA / PSB / RRB / NBFC-MFI / other
address	Full address
state	State
district	District
latitude / longitude	Geospatial coordinates
supported_scheme_ids	Schemes handled
phone / email	Contact information
official_source	Source for partner listing
last_verified	Verification date

8. Document Checklist Model

Field	Example
document_name	Income Certificate
mandatory	true
verification_status	missing / uploaded / verified / rejected

Field	Example
source	Scheme guideline / application form
notes	Validity or special instructions

9. Important Data Governance Rules

- Never invent missing eligibility conditions.
- Never merge rules from two different schemes.
- Store source URL and source page for every important rule.
- Keep last_verified and effective_date fields.
- If two official sources conflict, flag the conflict for human review instead of choosing silently.
- Do not present preliminary eligibility as final sanction.
- Do not claim a channel partner is authorized unless supported by an official listing.
- When a rule is unclear, return 'verification required'.
- Keep old versions of scheme rules so recommendation results can be audited.

11. Prototype Recommendation Scenarios

Scenario	Expected system behavior
OBC user wants a small business under ₹1.25 lakh	Compare applicable NBCFDC individual/small-loan routes and explain financing fit
OBC user needs ₹5 lakh for business	Prefer eligible higher-limit individual income-generating route if all rules match
OBC student admitted to a recognized institution	Evaluate education route; verify admission/marks conditions
Eligible OBC SHG	Evaluate group-loan route; verify 60% target-group membership rule
Sanitation worker wants viable business	Evaluate relevant NSKFDC income-generating schemes
Sanitation worker wants sanitation vehicle/equipment	Evaluate SUY/SWRS/NAMASTE-related route according to current rules
User lacks income certificate	Show 'application readiness' gap rather than rejecting the user automatically

12. Source Verification Checklist

- Confirm the source is an official government/corporation domain.

- Record the page/document title and page number.
- Record the date your team verified it.
- Check whether the page says 'last updated'.
- Extract eligibility separately from financial terms.
- Check whether the scheme is active/current.
- Check the application/channel-partner route.
- Capture exceptions, rebates, moratoriums and special categories.
- Do not use search-result snippets as the final source of truth.

13. Current Source Notes

The source registry in this document is based on official pages/documents retrieved during research on 02 September 2026. Several official pages have their own update dates, including NBCFDC's current pattern-of-finance page (07-Aug-2026) and NSKFDC scheme pages updated in May/June 2026. The NSFDC compendium used here is an official compendium containing a scheme index and detailed scheme sections; because individual scheme rules can change, verify the latest NSFDC publication before production use.

End of Knowledge Base

For production, expand this corpus with the latest official documents for every selected scheme, preserve page-level citations, and maintain versioned records rather than treating this PDF as a permanent source.
